Operational Recovery

When institutions find themselves face to face with a disaster, more often than not resources can be quickly marshaled to respond to and manage the event.

However, when the dust begins to settle, the after shocks are often more devastating and costly to the organization than the original crisis.

As a result, crisis recovery planning should be a part of any strategic planning process.

Operational Recovery

Every crisis initially produces
chaos.

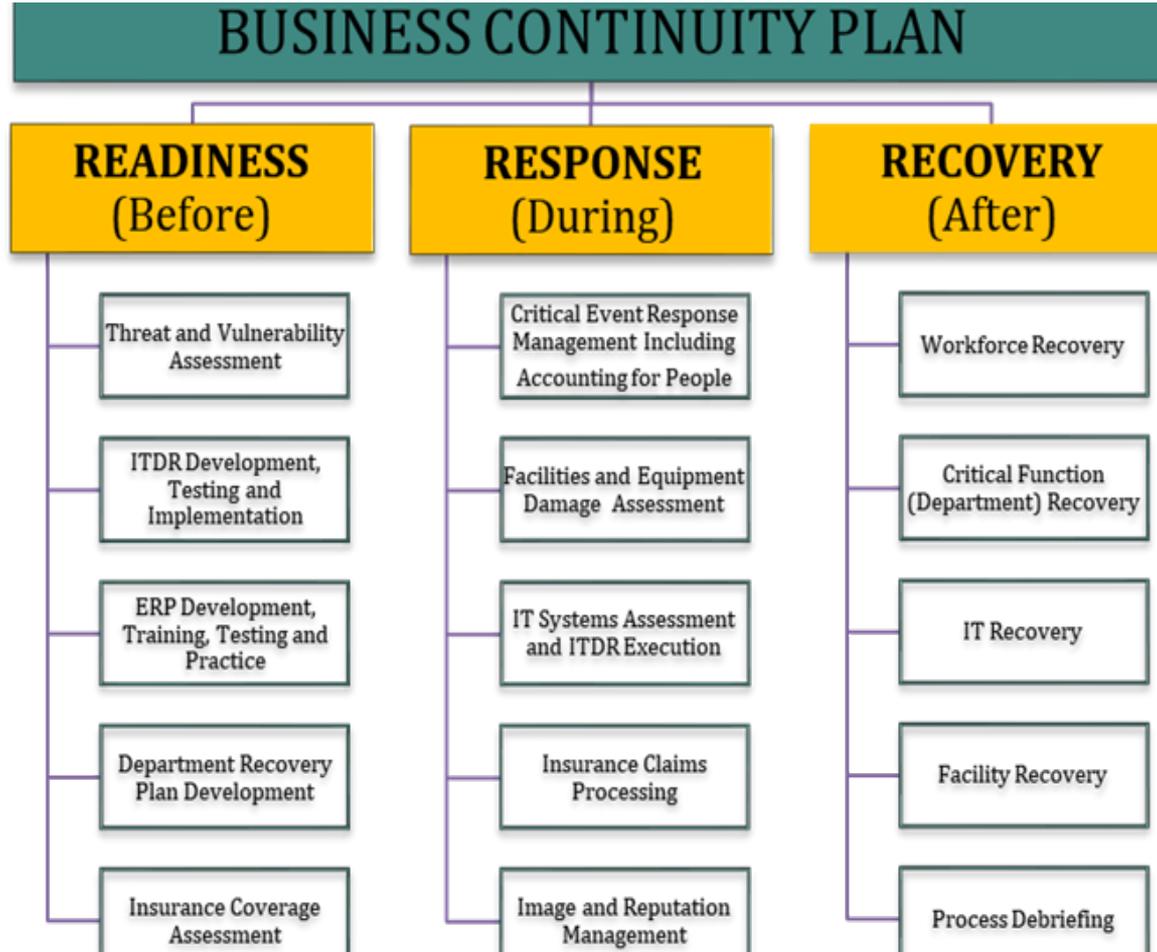

A plan can move an organization quickly from chaos
to controlled recovery.
